- **Company Name:** Crescent Pharma Limited
- **Product:** Ramipril 2.5 mg Capsules
- **Reason:** Packaging error
- **Indication:** Hypertension, heart failure and cardiovascular risk reduction

Note: **We have covered recalls irrespective of drug category**

This slide is non-exhaustive. For additional details or clarifications, please feel free to contact us at bd@octavusconsulting.com

UPDATES

OCTAVUS CONSULTING
Data.Insights.Decisions.

US Based Updates

Feb 02, 2026

US FDA Implements QMSR

Effective Feb 2, 2026, the US FDA implemented the Quality Management System Regulation (QMSR), replacing the previous Quality System Regulation by aligning U.S. medical device quality system requirements with ISO 13485:2016. The update also introduced a new FDA inspection process under Compliance Program 7382.850, replacing the previous QSIT-based inspections

Apr 20, 2026

US FDA Achieves First-Year Milestones in Reducing Animal Testing

The US FDA reported successful completion of the first-year milestones of its 2025 roadmap to reducing animal testing. The update highlights expanded regulatory acceptance of new approach methodologies (NAMs), including AI-based tools, to reduce reliance on animal testing in drug development

May 5, 2026

US FDA Issues CMC Flexibility Guidance for Cell & Gene Therapy BLAs

The US FDA guidance is about providing flexible Chemistry, Manufacturing, and Controls (CMC) requirements for human cellular and gene therapy (CGT) products seeking a Biologics License Application (BLA)
It explains how the US FDA may allow risk-based and phase-appropriate manufacturing, validation, specification, comparability and stability approaches to help developers of complex CGT products (such as gene therapies and cell therapies) bring treatments for serious or life-threatening diseases to patients more efficiently while still ensuring products are safe, pure, and potent

This slide is non-exhaustive. For additional details or clarifications, please feel free to contact us at bd@octavusconsulting.com

UPDATES

EU Based Updates

Feb 13, 2026

EMA Recommends Withdrawal of Levamisole-Containing Medicines

EMA's Pharmacovigilance Risk Assessment Committee (PRAC) recommended withdrawing all levamisole-containing medicines from the EU market after concluding that the risk of rare but serious leukoencephalopathy outweighs the benefits for treating parasitic worm infections

Mar 16, 2026

EMA Adopts Tailored Clinical Approach for Biosimilar Development

EMA adopted a reflection paper introducing a tailored clinical approach for biosimilar development, allowing comparative efficacy studies (CES) to be waived for many biosimilars when robust analytical comparability and pharmacokinetic (PK) data sufficiently demonstrate biosimilarity
The approach is intended to streamline biosimilar development, reduce unnecessary clinical trials, lower development costs and improve patient access, while maintaining the EU's standards for safety, quality and efficacy
